## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 7-26 rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims are directed to a mathematical algorithm or abstract idea without a practical application. See MPEP 2106. It is noted that the preamble to claim 1 is given no patentable weight as the elements recited there in are not referred to in the body of this method claim.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Karmarkar.

As referred to above the preamble of claim 1 is not being given any weight and therefor the claim lacks utility and any metes and bounds to which the body of the method claim can gain meaning. One is left with a mathematical calculation for

obtaining a solution to a linear equation. The method for solving such equations is disclosed in the reference AD to Karmarkar.

### ***Drawings***

The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. Applicant is required to furnish a drawing under 37 CFR 1.81. No new matter may be introduced in the required drawing.
